SAYA

BIG MACK-VCI STATREP

SUMMARY AND ANALYSIS FOR JULY 1971

Introduction

The VCI STATREP is a monthly report providing statistics on VCI strengths and influence over the population. This report provides a basis for estimates of VCI capability and threat.

Information is provided by District and Province Intelligence and Operations Coordinating Center (DIOCC and PIOCC). These centers are responsible for reporting on assigned geographical areas determined by Viet Cong administrative boundaries (hence the term "VC villages" indicates administrative areas, not control or authority).

Population percentages are determined by totaling the population for all hamlets within these geographical areas.

Statistical charts within this report do not necessarily total 100%. Entries within each statistical summary are not exclusive, i.e., villages, hamlets, VCI and other reported data may be included in more than one entry giving a total in excess of 100% or may not be reported at all giving a total much less than 100%.

BIG MACK-VCI STATREP

SUMMARY AND ANALYSIS FOR JULY 1971

I. Overview

25X1 A. ☐ The Big Mack for July shows a total of 63,921 VCI for RVN. This reflects an increase of 1927 from the total reported for June. The following chart shows the figures for the last two months.

	<u>June 1971</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/ Hamlet Level	17,963	23,090	41,053
Higher Level	8,174	10,467	18,641
Total	26,137	33,557 plus COSVN	2,300 61,994

	<u>July 1971</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/ Hamlet Level	18,094	24,754	42,848
Higher Level	7,415	11,358	18,773
Total	25,509	36,112 plus COSVN	2,300 63,921

25X1 ☐ The village/hamlet level category increased 1795, 93% of which were estimated cadre. The higher level showed an increase of 132 reflecting a decrease in the identified category and a greater increase in the estimated. Overall, identifications decreased 628, while the estimates increased 2555. This increase is better understood in the light of the fact that most provinces showed some slight decreases in their totals, while Pleiku and An Xuyen Provinces increased a total of 2726 from last month, 799 greater than the total change of 1927. In these two provinces the increases were in both the identified and estimated categories.

25X1 B. ☐ Population living in villages where the "authority and control" of the GVN is greater than the VCI was 97.6%, identical with June's report. There are 288 villages in RVN excluded from this category, with the VCI reported as having authority and control as great or greater than the GVN. In 769 villages, in which 17.9% of the total HES-counted population lives, the authority and control of the VCI are rated "at least significant." This represents a decrease of 1.2% from the June figure. In all Big Mack reports, "total population" refers to the Hamlet Evaluation System current population figures.

Approved For Release 2004/10/28 : CIA-RDP80R01720R001100060041-5

	<u>Number of VC Villages</u>	<u>% of Total Population</u>
Total VC Villages Reported	2414	100.0
No VCI Known To Exist	396	23.3
Marginal Authority and Control	1249	58.6
Less than GVN, but Significant	481	15.5
Equal to GVN	77	1.6
Greater than GVN	47	.5
VCI only Government in Village	164	.1
Authority and Control At Least Significant	769	17.9
Authority and Control As Great or greater than GVN	288	2.4

25X1 C. ☐ Only 0.6% of the population lives in the 153 villages where the VCI conduct operations openly day and night. An additional 2.4% of the population of the RVN lives in those 134 villages where the VCI operates secretly by day and openly at night. 39.7% of the population lives in 1235 villages where the VCI were able to conduct operations on a more than occasional basis; this percentage, which includes the two percentages above, reflects a decrease of 1.3% from the June figure.

	<u>Number of VC Villages</u>	<u>% of Total Population</u>
Total VC Villages Reported	2414	100.0
No VCI Exists	391	21.9
Exists, but does not operate	198	12.4
Only operates occasionally	590	25.8
Operates secretly and only at night	675	27.5
Operates secretly day and night	273	9.1
Operates secretly in the day/ openly at night	134	2.4
Operates openly during day and night	153	.6
Operates regularly, secretly or openly, day or night	1235	39.7
Operates openly either by day or by night or both	287	3.0

25X1 D. ☐ The VCI provided governmental-type services to 230 villages in which 5.0% of the population resides. This is a decrease of 0.9% from the June report. As in previous months, legal services were provided to the greatest number of people, with medical services following.

CONFIDENTIAL

	Number of VC Villages	% of Total Population
Total VC Villages Reported	2414	100.0
Villages having VC Educational system	83	1.5
Villages having VC Medical system	141	2.2
Villages having VC Legal system	124	3.1
Villages having VC Financial system	63	1.5
Villages having at least one VC Provided Government Service	230	5.0

25X1 E. ☐ Revolutionary Committees and Councils (RC's) represent a major political and psychological threat to the GVN. The extent to which they exist and perform their operations independent of other local party organizations should be considered in the light of their general presence throughout the RVN. The following tables show number of RC's reported by VC village, district, and province boundaries and the overlap of the RC's and other VC village party organizations.

	Number Reported	Percentage of Vil/Dist/Prov Having RC's
Total VC Villages	2414	
Villages Having RC's	965	39.9
Total VC Districts	276	
Districts Having RC's	164	59.4
Total VC Provinces	41	
Provinces Having RC's	37	90.2

Party/RC Overlap

	Number of VC Villages	% of Total Population
Total VC Villages reported	2414	100.0
RC Exists	965	33.6
RC's perform functions substan- tially independent of other VC Village party organizations	203	7.4

25X1 F. ☐ The VCI residence question may not be a valid indication of the effectiveness of the VC in his own area, however, it may be helpful in determining the extent of security in his locale which might force him to seek refuge away from his home. In July 1968, 13.1% of the population lived in 461 villages where VCI cadres were also able to maintain full-time residence.

CONFIDENTIALII. MR Overview

25X1 Although the total strength figures in RVN for the month of July showed a gain of only 123, the strength figures for MR2 showed a total increase of 1,914. This reflects an increase of over 15% from the previous month with the largest increase being the 1,334 in the estimated category. Aside from MR2, the greatest changes were in MR3 (a total decrease of 917) and MR4 (a total increase of 902). This month's figures also showed that the majority of changes were in the estimated category.

	<u>MR1</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/			
Hamlet Level	6,147	3,944	10,091
Higher Level	1,209	2,203	3,412

II. MR Overview

25X1

[] The month of July marked the first time since the institution of the new Big Mack reporting system that MR 4 has not led the rest of RVN in the presence of VCI provided government services. July's report shows that 7.9% of the population of MR 2 lives in villages where the VCI provides some form of governmental service. This shows an increase of 1.6% over the previous month.

25X1

[] Since the institution of the new Big Mack collection system in November, governmental services in MR 2 have increased from 4.2% to the present 7.9%. During the same reporting period, MR 4 has decreased from 13.4% to the present 7.8% of the population provided with at least one VCI governmental service.

25X1

[] MR 2 also provides the VCI with the greatest opportunity for significant authority and control in RVN. A total of 31.1% of the population living in 256 of the 619 villages reported in MR 2 are exposed to some form of significant VCI authority and control. However, MR 4 continues to lead the rest of the country in VCI access. July's report shows that the VCI conduct operations on a more than occasional basis in 464 of the 773 villages reporting. These 464 villages house 53.7% of the population in MR 4. VCI influence is summarized in the following chart (the parentheses indicate significant changes from the June figure).

	Percentage of Total Population in the MR			
	MR 1	MR 2	MR 3	MR 3
No VCI Exists	22.4	13.8	41.3	8.5
Exists, but does not operate	17.4(+3.0)	12.1(+3.8)	8.5	13.3
Only operates occasionally	23.1	27.0(-4.8)	28.6	24.3(+3.7)
Operates secretly and only at night	27.1	29.6(+3.0)	18.8	34.3
Operates secretly day and night	6.8	8.7(-4.1)	1.5	17.0
Operates secretly/day openly/night	2.2	7.4	.2	2.1
Operates openly during day and night	.7	1.2	.7(+.7)	.2
Some Government service provided	3.8	7.9	.9(-2.2)	7.8
VCI authority equal or greater than GVN	1.7	8.3	.0	2.1
Significant authority, but less than GVN	19.7	31.1	3.7	23.3

III. Province Overview

25X1 A. [] The Big Mack measures the VCI influence over the population in three areas. These are the VCI's access to the population, the VCI's services for the population, and the VCI's authority over the population. By averaging the rankings for each GVN province on these criteria, an evaluation of overall enemy political influence can be constructed. The following chart portrays the ten provinces where the enemy exercises the least political influence and the ten provinces where the enemy exercises the most political influence. Figures in parentheses to the left indicate the Big Mack influence rankings for June, while the figures in parentheses to the right indicate the province ranking according to HES (percent AB secure population) for July.

1	(1)	An Giang	(1)	44	(37)	Phong Dinh	(18)
2	(4)	Gia Dinh	(6)	43	(42)	An Xuyen	(35)
3	(5)	Quang Duc	(31)	42	(43)	Binh Dinh	(44)
4	(2)	Lam Dong	(15)	41	(41)	Chuong Thien	(39)
5	(6)	Long An	(25)	40	(44)	Kien Hoa	(41)
6	(3)	Long Khanh	(21)	39	(40)	Vinh Binh	(42)
7	(11)	Bien Hoa	(9)	38	(39)	Dinh Tuong	(23)
	(9)	Go Cong	(3)		(24)	Pleiku	(36)
	(12)	Sa Dec	(8)	36	(35)	Quang Ngai	(43)
10	(9)	Kien Phong	(4)	35	(37)	Phu Yen	(38)

25X1 [] The differences between the Big Mack and total HES rankings reflect the fact that measures of security are not identical with measures of political influence. The enemy's political influence can be high in areas where military activity and terrorism are low, and vice versa.

25X1 B. [] The Big Mack includes the first systematic attempt to measure the extent of the VCI's medical, educational, legal, or financial "governmental services" to the population. Twenty-two provinces show some indicators of these services; and of these, ten show substantial evidence of these services. In addition, 19.3% of the population of Cam Ranh City receives some type of VCI governmental service. These ten provinces, in which at least ten percent of the population lives in villages where there are VCI-provided services, follow:

Phong Dinh	34.7%	Tay Ninh	13.2%
An Xuyen	20.3%	Phu Yen	12.6%
Kien Hoa	18.9%	Chuong Thien	10.7%
Binh Dinh	18.3%	Quang Nam	10.1%
Vinh Binh	14.1%	Tuyen Duc	10.1%

BIG MACK-VCI STATREP

SUMMARY AND ANALYSIS FOR JULY 1971

I. Overview

25X1 A. ☐ The Big Mack for July shows a total of 62,446 VCI for RVN. This reflects an increase of 452 from the total reported for June. The following chart shows the figures for the last two months.

	<u>June 1971</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/ Hamlet Level	17,963	23,090	41,053
Higher Level	8,174	10,467	18,641
Total	26,137	33,557	plus COSVN 2,300 61,994

	<u>July 1971</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/ Hamlet Level	17,688	23,685	41,373
Higher Level	7,415	11,358	18,773
Total	25,103	35,043	plus COSVN 2,300 62,446

25X1 ☐ In the village/hamlet level category, the estimated category increased 595, whereas the identified category decreased 275. The higher level showed an increase of 132 reflecting a decrease in the identified category and a greater increase in the estimated. Overall, identifications decreased 1,034 while the estimates increased 1,486.

25X1 B. ☐ Population living in villages where the "authority and control" of the GVN is greater than the VCI was 97.6%, identical with June's report. There are 288 villages in RVN excluded from this category, with the VCI reported as having authority and control as great or greater than the GVN. In 769 villages, in which 17.9% of the total HES-counted population lives, the authority and control of the VCI are rated "at least significant." This represents a decrease of 1.2% from the June figure. In all Big Mack reports, "total population" refers to the Hamlet Evaluation System current population figures.

II. MR Overview

25X1

☐ The total strength figures in RVN for the month of July showed a gain of 452. The greatest increase occurred in MR 4 where 902 more VCI were reported over that of June. The greatest decrease, 983, occurred in the identified category of MR 3.

	<u>MR1</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/ Hamlet Level	6,147	3,944	10,091
Higher Level	1,209	2,203	3,412
Total	7,356(-228)	6,147(+256)	13,503(+28)

	<u>MR2</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/ Hamlet Level	4,222	5,792	10,014
Higher Level	2,086	3,033	5,119
Total	6,308(+174)	8,825(+165)	15,133(+339)

	<u>MR3</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/ Hamlet Level	2,317	2,807	5,124
Higher Level	2,592	3,030	5,622
Total	4,909(-983)	5,837(+66)	10,746(-917)

	<u>MR4</u> <u>Identified</u>	<u>Estimated</u>	<u>Total</u>
Village/ Hamlet Level	5,002	11,042	16,044
